Apollo Health Check

Business Challenge

IT executives are constantly striving to ensure business continuity and increase the speed of delivery. Technology and staff changes can be disruptive to the business and, over time, impact the performance value received from software implementations like Apollo GraphOS.

An Apollo Health Check provides visibility into your Apollo GraphOS implementation to give you a firm understanding of your current status and identify opportunities for more effective product use. Based on consultations with your teams and an in-depth review of your Apollo GraphOS implementation, an Apollo consultant will assess the state of your implementation, address challenges, and provide recommendations to support your team's goals.

Who Will Benefit?

Customers using Apollo Graph OS for at least 6 months who:

- Have undergone staffing or technology changes that may impact their use of Apollo GraphOS.
- Want an expert review of how they are doing, what they can do better, and what has changed with their Apollo GraphOS implementation over time.
- Want an expert recommendation on next steps based on a review of their graph goals and areas of concern.

What You Can Expect

Through a combination of stakeholder interviews, implementation inspection, and automated discovery, an Apollo consultant will produce a report on your use of Apollo GraphOS. This reports covers the state of your implementation, conformance with best practices, and recommendations for optimizations.

The consultant will provide guidance on common concerns, including:

- Subgraph Design
- CI/CD Workflows
- Entity Type Boundaries
- Subgraph Caching Strategies
- Security Review
- Future Expansion Plans

Customer Benefits

- Expert review of Apollo GraphOS related goals, processes, and areas of opportunity
- Identify areas for improvement and learn how to best address them
- Guidance on future growth and use case expansion
- Ensure your team is operating according to best practices

Expected Outcomes

- Clear path forward to maximize ROI of your Apollo GraphOS implementation in accordance with business and graph goals
- Technology alignment with desired business outcomes, including future growth
- Minimize business disruption resulting from staff turnover or technology changes

Apollo Health Check
